2026 Topps Cosmic Chrome Baseball

SSP & Rare Insert Research Guide

13 rare-insert families | 190 subject spots | 24 MLB teams represented

Savvy groups non-autograph insert families whose best published pull rate is at least 1 in 500 packs across offered formats. This is a curated research label, not an official Topps SSP designation or a guaranteed case hit. Supernova remains a separate chase because Lunar packs have a 1 in 77 pull rate.

Ranked by unique subject count, then name. A smaller subject pool is not a statement of better pack odds. Each athlete is counted once per family and team; parallels collapse. Rookie flags follow normalized player identity. Printed historical teams remain listed where they differ from the browse franchise.
